Keywords: Customer Perception, ICICI Prudential, Digital ERA

I. INTRODUCTION

Customer awareness is a marketing perception that includes a consumer's impression, consciousness or willingness about a concern. It is affected through advertising, personal experience and other channels. The profitability of business and success or failure depends on customer perception. It is three stages procedure that interprets raw incentives into meaningful information i.e. disclosure, responsiveness and analysis. In other terms, it is how a purchaser

see's specific brand which whatever he or she had been also to recognize through watching the goods, its advancements, feedback etc. With high life insurance businesses offering comparable rules. Product variation is tough in progressively reasonable marked. As a consequence, insurance businesses in India are now moving from a manufactured goods centered method to a purchaser centered strategy. The effort is on increasing consumer fulfillment by improved purchaser preservation, loyalty and profitability. Through online insurance people no information more about the policy and they can avoids spending more time for it, which indulges them for not seeking the help of intermediaries.

II. REVIEW OF LITERATURE

Sumit Banerjee, (2017) in their research paper entitled "analysis of customers' perception towards investments ICIC prudential life insurance company" says that, the attainment of an insurance company depends upon its capacity to appeal and preserve consumers that are prepared to buy products and facilities at values that are profitable to the company.

Dr. MaheshRajgopal (2013) in their researcher paper entitled "Changing perceptive of life insurance buyer's – some empirical evidence from, Karnataka says that, before opening up of the insurance segment for private participation in 2001, life insurance sector for privates contribution in 2001, life insurance corporation LIC was not an interesting study then. competition in the marketplace but also developed the service value, product range and life insurance literacy and hence understanding the perceptions of life insurance buyers towards various aspects of life insurance past deregulation has assumed greater significance.

The present study attempts to know the significant perceptual changes in the minds of life insurance buyers towards life insurance after deregulation. Various statistical analysis are carried out using tools such as descriptive statistics analysis of various (ANOVA) Levene's test for equality of variances, takers- HSD multiple comparison to arrive at concrete findings and based on which suggestions are offered.
